Marco Gamboa

Aspiring software developer with hands on experience on the development cycle of software and games, across multiple projects and programming languages.

Technical Proficiencies

Languages: C#, C++, Lua, HTML, CSS
Tools: SQL Server, MySQL, Entity Framework Core, ASP.NET Core
Version Control: Git, Bitbucket
Game Development: Unity, Unreal Engine

Projects

Project Management Application

- Uses C#, ASP.NET Core, SQL Server, Entity Framework Core.
- Built a web application for managing projects and their associated tasks.
- Implemented CRUD operations.
- Used service classes to organize application logic and responsibilities.
- Developed user specific projects and tasks, with access restrictions.

Portfolio Website

- Uses HTML, CSS, Jekyll.
- Built a website to showcase software and game development projects.
- Used no JavaScript to better understand HTML and CSS.

Broxy Path

- Uses Lua.
- Built 2D game using the Love2D Library.
- Reads .png files for level creation.
- Saves game data using JSON serialization.

Procedurally Generated Terrain

- Uses Unreal Engine, C++.
- Built a concept project that procedurally generates terrain.
- Uses 2D Perlin Noise.
- Creates meshes during runtime.
- Implement chunk system to optimize mesh generation.

Education

Southern New Hampshire University
Bachelor's Degree - Game Development and Programming
Boot.dev – Learn SQL
